 - Version Control: Git
 - Problem Solving
 - Attention to Detail
 - Collaboration and Teamwork
-

EDUCATION

Bachelor of Science in Business Administration

Saint Joseph College, Maasin City, Southern Leyte

(2012 – 2016)

BUSINESS EXPERIENCE (2016-2024)

I worked for my father's small business selling Direct-to-Home Satellite Television. I was the one setting up and maintaining the integrity of the customer's records, it had around 10,000+ customers.

CAREER SHIFT

I really love the idea of creating solutions that fit businesses like a glove, which is why I'm excited to put my skills to work in a team where I can contribute, innovate, and make a real impact on how companies thrive.

PROJECTS

- I've created a web application, <https://waltrosoft.com/> using CodeIgniter, PHP, JavaScript, CSS, HTML5, and Bootstrap. This application streamlines record-keeping, allowing tasks like searching, adding, updating, and deleting entries.
 - <https://wdmtv.store/> - A small business website made in vanilla PHP, Javascript and Materialize CSS. Integrated with an online payment system using Xendit's API.
 - Implemented user authentication and authorization systems.
 - Designed and implemented database structures for storing and retrieving data.
 - Utilized PHP, JavaScript, and SQL for building robust functionality.
 - Collaborated with end-users to gather feedback and incorporate improvements.
